54+ 3813379225

FrontEnd developer with solid knowledge in **React, Javascript, Typescript, ECS6+, HTML5** and **CSS3**, I have 4 years of experience in the programming sector, I specialize in creating accessible, interactive and intuitive interfaces with great attention to detail. Although my main focus is FrontEnd, I also have experience in Full Stack and BackEnd roles, which qualifies me for positions with these characteristics.

PROFESSIONAL EXPERIENCE

Software Developer

CENSYS S.A.

Dec. 2023 - Actualidad

I participated in the development, implementation and maintenance of functional requirements for banking systems, with a Full Stack approach that integrates **PowerBuilder** in the FrontEnd and **SQL** in the BackEnd, within an agile framework under the **Scrum methodology**. I developed modules individually and in groups, I gained experience in the use of technical documentation (AFR and Development Guides). In addition, I provided training to lower senior colleagues, the client and other scrum teams on requirements I developed and technical queries. Manage my work and activities with **Jira**.

SQL - T-SQL - PowerBuilder - Sybase - Jira - Redmine - Scrum

Full Stack Developer [MERN]

Freelance

Jun. 2021 - May. 2024

I carried out the development and maintenance of more than 12 web applications using the **MERN stack**, including **e-commerce, SPAs, blogs**, among others. In each application, I ensured performance, responsive design, accessibility, **SEO**. I deployed all the applications using services such as **Vercel, Render** and **Heroku**. I implemented features such as payment gateways and means of contact consuming various APIs (MercadoPago, Nodemailer, WhatsApp, etc.). Additionally, I managed application version control with **Git/GitHub** and managed the flow of activities using **Trello**.

React - Node - Javascript/Typescript - HTML5 - CSS - Express - MongoDB - Postman - Git/Github - Trello - SEO Vercel - Render - Canva
