Professional Summary

Full Stack Software Engineer with over 6 years of experience building robust, scalable web applications. Proficient in modern ecosystems (JavaScript, TypeScript, React.js, Node.js) and database management (SQL/NoSQL). Proven track record of architecting efficient front-end and back-end solutions from MVP to production. Highly focused on complex problem-solving, cross-functional collaboration, and optimizing development workflows to drive product success.

Professional Experience

CAW TECH <i>Principal Software Engineer</i>	Tucumán, Argentina Sep 2025 – Present
- Spearheaded the technical architecture and end-to-end development of B2B web applications using modern stacks (Next.js, TypeScript, Node.js, Supabase), designing and implementing highly efficient RESTful APIs. Volley Manager: Architected the SaaS platform from MVP to international commercial scalability, implementing secure real-time management solutions and seamless dynamic payment gateway integrations. ExpoLogic: Engineered a dynamic resource allocation engine for event management, automating logistics and successfully reducing manual operational workload by 50%. - Integrated AI-driven workflows (Cursor) to accelerate feature delivery lifecycles and efficiently scale product architecture.	
CENSYS S.A. <i>Software Engineer</i>	Tucumán, Argentina Dec 2023 – Jun 2025
- Developed and maintained mission-critical modules for Core Banking systems, ensuring strict transactional integrity in high-volume data environments. - Designed and optimized complex queries and Stored Procedures in SQL databases, achieving up to a 60% improvement in execution times for financial reporting environments. - Conducted comprehensive mentorship and progress tracking for the onboarding of new developers, accelerating their seamless integration into the workflow.	
Globant <i>Front-End Engineer Intern (Web UI)</i>	Tucumán, Argentina Jul 2024 – Oct 2024
- Built responsive and fully accessible web interfaces utilizing React.js, TypeScript, HTML, and CSS while collaborating within cross-functional Agile (Scrum) environments. - Optimized UI component rendering and lifecycle management, successfully reducing initial load times by approximately 20%.	

Education

Universidad Tecnológica Nacional (UTN) <i>B.S. in Information Systems Engineering (In Progress)</i>	Mar 2022 – Present
Universidad Nacional de Tucumán (UNT) <i>Diploma in Data Science for Organizations</i>	Apr 2025 – Dec 2025
California State University, Northridge (CSUN) <i>Digital Revolution and e-Business (International Program)</i>	Jul 2025 – Aug 2025

Technical Skills

Languages: JavaScript, TypeScript, SQL, T-SQL, Python, HTML, CSS. Front-end: React.js, Next.js (App Router), Tailwind CSS, shadcn/ui, Zustand. Back-end & Databases: Node.js, Express.js, Supabase, RESTful APIs, PostgreSQL, MongoDB (NoSQL). Tools & Methodologies: Clean Code Practices, Git, CI/CD, Scrum, Code Reviews, AI-Assisted Development. Spoken Languages: Spanish (Native), English (C1 – Advanced Professional Proficiency).
