PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 5+ years building modern web applications, B2B/SaaS products, and enterprise systems. Deep focus on TypeScript, React, Next.js, and Node.js, complemented by SQL/backend engineering and hands-on experience modernizing enterprise and banking systems. Combines product engineering, technical ownership, and architecture decision-making with measurable production impact.

PROFESSIONAL EXPERIENCE

Principal Software Engineer, Co-Founder

CAW Tech — Argentina, Remote | Sep 2025 - Present

- Own technical direction, system architecture, and end-to-end delivery of CAW Tech products, including architecture decisions, software design, integrations, database and backend choices, frontend architecture, deployment, and product evolution.
- Volley Manager: led architecture and end-to-end development of a production SaaS/PWA supporting daily operations for a professional volleyball club in Bolivia, serving approximately 700 athletes and 15 staff and processing roughly 600 daily access/check-in events.
- Built administrative, financial, attendance, notification, and access-control workflows (QR-based and consent-based facial recognition), plus online registration and payment integration with Banco Economico (Bolivia).
- Designed an interactive volleyball scouting tool, an AI-assisted club information system, and a voice-based scouting workflow for coaches.
- ExpoLogic: architected and developed a multi-tenant B2B2C SaaS platform to digitize fair and market-space management, replacing manual spreadsheets and paper floor plans with interactive real-time maps, reservations, waitlisting, and per-vendor virtual storefronts.
- Led market validation through approximately 50 field interviews across fairs and markets in Tucuman, sizing an addressable market of 3,500+ active fairs and 50,000+ recurring vendors nationally, and defined a multi-stream business model (per-event fee, maintenance subscription, and setup fee).
- Presented ExpoLogic at Emprende U and advanced to the semifinal round, validating the business case; the product was subsequently featured by La Gaceta, a leading regional publication.
- Designed CAW Education, a data-driven education platform for schools.

Software Developer, Banking

CENSYS S.A. — Argentina, Remote | Dec 2023 - Jul 2025

- Maintained and adapted banking modules for Sucredito Bank (BSR) and Banco Santiago del Estero (BSE), implementing requirement changes while protecting transactional integrity in high-volume production systems.
- Designed and tuned stored procedures, triggers, and SQL (Sybase / T-SQL) for stability and performance, achieving up to 60% faster execution on financial reporting workloads.
- Integrated SOAP APIs, validated with Postman, supported UAT cycles, and handled post-deployment incidents across business-critical banking flows.
- Implemented a hardware-assisted credit-card statement payment flow: operators scan the statement barcode with a reader, the system automatically matches records, and the credit-card summary payment is processed from there.
- Mentored new developers through onboarding across technologies, Scrum practices, and team workflows, coordinating day-to-day development with the tech lead and QA/test engineers.

Front-End Engineer Intern, Web UI (SSR)

Globant — Yerba Buena, Tucuman, Remote | Jul 2024 - Oct 2024

- Selected for a competitive internship program among approximately 500 applicants; completed the program alongside a full-time role at CENSYS, outside of CENSYS working hours.
- Built React, TypeScript, and Zustand applications in Agile teams, improving UI rendering and lifecycle practices and reducing initial load times by approximately 20%.
- Participated in Git/GitHub workflows, code reviews, and frontend architecture discussions.

Full Stack Web Developer, MERN

TecnoLine — Tucuman, Hybrid | Jan 2023 - May 2024

- Owned end-to-end delivery of 12+ production web applications, including e-commerce sites, SPAs, and admin systems, including a period of concurrent work alongside CENSYS.
- Integrated APIs, payment gateways, and external services; treated SEO, accessibility, and PageSpeed performance as first-class engineering concerns.
- Managed the full deployment lifecycle on Vercel and Render, including ongoing client support.

Front-End Web Developer, Freelance

Self-Employed — Argentina, Remote | Jun 2021 - Dec 2022

- Designed and built websites for entrepreneurs and institutions, including hosting, deployment, maintenance, and commercialization of reusable templates.

TECHNICAL SKILLS

Core: TypeScript, JavaScript, React, Next.js, Node.js, SQL, PostgreSQL, Tailwind CSS, shadcn/ui, Zustand, PWA

Backend and Data: Express, REST APIs, Supabase, MongoDB, Redis, T-SQL, Sybase

Engineering Practices: Software Architecture, Product Engineering, API Design, Database Optimization, Git, CI/CD, Testing, TestSprite, Playwright, Scrum

Domain Experience: SaaS / Multi-Tenant Systems, Enterprise Systems, Legacy Modernization, Banking, PowerBuilder

Languages: Spanish (Native), English (C1)

EDUCATION

Information Systems Engineering (In Progress) — Universidad Tecnologica Nacional (UTN), Argentina | Mar 2022 - Present

Graduate Diploma, Data Science for Organizations — Universidad Nacional de Tucuman (UNT), Argentina | Apr 2025 - Dec 2025

International Program, Digital Companies and E-Business Revolution — California State University, Northridge (CSUN), USA | Jul 2025 - Aug 2025

SELECTED CERTIFICATIONS

Cloud Computing, AWS — Coderhouse, May 2025

Business English — CSUN, 2025

Management and Processing of Organizational Data — UNT, Oct 2025
